PROFESSIONAL EXPERIENCE

Software Developer
Company Name | City, India
Month/Year - Present

- Applied advanced object-oriented programming techniques and design principles to enhance the software architecture, resulting in a 20% improvement in system efficiency and scalability.
- Developed and deployed RESTful APIs using Spring Boot, facilitating robust integration with external systems and boosting data accessibility by 30%.
- Managed and optimized MySQL databases to handle 100,000+ records daily, showcasing proficiency in complex data operations and query optimization.
- Collaborated with 4 cross-functional teams to define and translate project requirements into actionable development tasks, contributing to a 25% increase in project delivery speed.
- Effectively used Git for version control, managing over 1000+ commits, actively engaged in Agile practices, including sprint planning and backlog refinement.
- Dedicated 10+ hours per week to professional development, mastering new technologies and industry trends, which led to a 15% increase in innovation and efficiency in project outcomes.

SKILLS

Languages: Java, J2EE
Technologies & Tools: Postman, Jira, Maven, Git, MySQL, AWS, SonarQube, Splunk, Microservices
Frameworks: Spring Boot, Mockito, Spring REST

EDUCATION

Bachelor of Engineering (B.E.)
Information Technology
Your College Name - (2016-2019)
Score: 8.25 GPA

DIPLOMA
Computer Engineering
Government Polytechnic - (2013-2016)
Score: 84.89%

PROJECTS

Credit Score Analysis Tool, Swedbank (Sweden)

Description:
Automated credit score evaluation platform integrating data from multiple sources to provide real-time scoring and predictive analytics. Utilized microservices architecture for scalability and efficiency.

Contributions:

- Worked on the implementation of real-time credit scoring using Kafka, enhancing decision-making speed.
- Collaborated with the team to develop REST APIs and implement business features for seamless functionality.
- Integrated OAuth for secure user authentication, ensuring robust system security.
- Utilized Redis cache for efficient data caching, optimizing application performance and reducing database load.
- Contributed to the design and development of the microservices architecture, enabling easy deployment and maintenance.

Your Other Projects:

Contribution:

- Developed and maintained backend server-side code using Java and Spring Boot for a commerce based application, facilitating seamless user interaction.
- Implemented JPA repositories application to facilitate seamless interaction with the underlying MySQL database, ensuring efficient data access and management.
- Created RESTful APIs to enable smooth communication between frontend and backend systems.
- Wrote comprehensive unit tests to ensure code quality and maintain high code coverage.

ACHIEVEMENTS

- Awarded an "Instant Impact Award" for delivering a critical feature under tight deadlines.
- Named "Best Performer of the Year" for FY22.
- Received an "Outstanding Performance Rating" in both FY22 and FY23.
